### EMERGING MARKETS

The potential for the development of emerging markets is clear. Yet in today's world of global insecurity, the realization of these opportunities remain mired in uncertainty.

Bringing together key figures from corporate and academic circles, this six-part series will offer financial professionals invaluable insight into the economic and political developments in critical regions.

The aim of this series is to provide a unique forum where experts and practitioners are able to engage fully in informal roundtable discussions. To ensure that all participants can engage in meaningful discussions places at this event are limited and reservations will be accepted on a first-come-first-served basis. Delegates are encouraged to register early to avoid disappointment.

### ADMINISTRATIVE DETAILS

**Dates:** 1 October 2004 - 31 March 2005

**Time:** 12.30 - 14.30 (Lunch: 12.30 - 13.00)

**Venue:** Chatham House, 10 St James's Square, London, SW1Y 4LE

**PROGRAMME CHANGES:** It is sometimes necessary to change the timing or content of the programme. The International Economics Programme will not be liable for any such unavoidable changes.

### ABOUT THE ORGANIZERS

#### CHATHAM HOUSE

Chatham House (The Royal Institute of International Affairs) is a globally renowned centre of excellence for research, analysis and discussion of international affairs. The Institute helps organizations to be at the forefront of developments in an ever-changing and increasingly complex world.

#### INTERNATIONAL ECONOMICS PROGRAMME

The International Economics Programme at Chatham House is focused on the study of international economic policy. Core research activity concentrates on economic growth and productivity, public finance, international finance and trade.

#### OXFORD ECONOMIC FORECASTING

Oxford Economic Forecasting was founded in 1981 to provide independent forecasting and analysis tailored to the needs of business economists and planners. It is now one of the world's leading providers of economic forecasting analysis and models.
